

# WEBINAR

June 8, 2017 at 2 PM ET

# Celebrating Canada 150

**Join staff from Science World British Columbia as they share the events and programs they offered as part of their Innovation 150 celebrations.**

Science World staff will discuss how they learned from and with the Actua Maker Mobile team as they delivered school workshops, a “grown-up science” evening, and public programming. They also recruited local experts to engage visitors in QUANTUM: The Exhibition, and presented demonstrations and programs to delve further into quantum science and technology.

Explore how your science centre might leverage established connections with local science promotion organizations to collaborate on celebrating science and innovation in your building and beyond.

## **Sandy Eix, Director of STEM Learning**

Sandy has been inventing exhibits, programs, and shows at Science World for 20 years. Highlights include developing exhibitions about fuel cells, pop music, and the art and science of light; running a summer camp for teachers; creating science resources for preschoolers; training science centre professionals in Turkey; and building our Tinkering Space.

## **Jesse Brydle, Program Specialist**

Jesse has worked as a science centre educator for 6 years in the East and West of Canada. He has created programs and workshops for audiences in science centres and on the road, and currently coordinates public programs at Science World, including theatre programming and adult-only events.

## **Tammy Matheson, Program Director of the Community Scientist Initiative**

Tammy connects Science World visitors with local, passionate professionals to explore current science and research through programs like Meet a Scientist, Café Scientifique and our annual Around the Dome Science Festival.
